

Dear Parent or Guardian:

Congratulations!

You have taken the first step toward protecting your child....

Obtaining a copy of your child's fingerprints is a tool to protect your child if the unthinkable happens. This document will serve as a reference to help the police locate your child faster.

Fingerprint all your children, no matter what their age. Infants and toddlers should be re-fingerprinted until the age of three. Children older than three should only be re-fingerprinted if the prints fade, are damaged, or if your child has an accident that scars their fingers.
